

SMEs SNETPFORWARD Webinar Scope

3rd May 2023, 14:00 – 17:30

SNETP was created to support and promote the European nuclear R&D&I ecosystem. As part of the ongoing EURATOM project SNETPFORWARD, the association aims to consolidate its structure, strengthen its position in the SET-Plan and among European ETIPs to enhance its ability to interact with the European and International members. SNETP also wants to boost the innovation capacities of its members.

In the context of the work package dedicated to innovation, SNETP will organize a webinar with all SMEs members for SNETP to understand their needs and maximize their participation in European collaborative project. This webinar will be a time exchange with a presentation of the different EU funding opportunities as well as good practices, presented by SNETP Secretariat. It will also be an opportunity to discuss the consequences of being involved in an EU project between newcomers, past and parties currently involved in EU-funded projects. SNETP expertise and services will be presented to members as a support for future opportunities. A special attention will be given on the upcoming calls for projects of Euratom (2023 calls).

Invitations will be limited to SNETP members: the aim is to gather all small entities involved in SNETP, but also bigger groups to give them the opportunity to listen to smaller entities' needs and to identify potential collaborative actions.
